MaGIC CHANGES AND KALEIDOSCOPICAL VIEWS. PROPOSALS FOR IMPROVING THE HARBOR OF Providence, Rhode Island.—Rugineer Department, Washington, May 13, 1838. Proposals will be reserved at this effect until the 15th June next, for removing the shoal at and near the erock in the harbor of Providence, Rhode Island, and opening a straight elasanel from Few Point to the main one below by dredging machinery—the channel to be 180 feet wide, and excavated to nine feet deep at mean low water, the mean distance requiring to be desponed being two hundred and eighty yards.

The shoal is composed of mud, and, and some shells. The material excavated, which is to be delivered into suitable secons for measurement, may be deposited on the flats to the westward, or en those to the castward of the main channel, so as not to interfere with the navigation or private interests, the distance to which it will require to be taken being about three hundred yards.

The mean rise of the tide is six feet, giving fifteen feet greatest depth of water generally in which the machinery will be required to operate.

The shannel is to be indicated or marked out, and the work is to be superintended by an officer of the United Status sugineer department.

The amount of material to be removed is estimated at 13,000 cable yards, but the engineer department reserves the privilege of varying this amount, so as to bring its cost within the limits of the appropriation for this improvement.

The proposal which are not be weet to be performed it within the limits of the appropriation for this improvement.

The proposal which are to be senied and endorsely the remaining twenty per cent to be were to be performed it remaining twenty per cent to be senied and endorsely will be reposals which are to be senied and endorsely, will state the price per cubic yard excavated and removed, as aforessid.

For further information application may be made to Capt. George Dutton, corps of engineers, New Haven, Connecticut.
